

Brainstorm session

AI Applications for organizations

Introduction

In the first phase of the Double Diamond, it is important to do a brainstorm session on the topic you are working on. This will be for writing some ideas down and other related ideas that can be useful. I used stick notes in Miroboard with a few topics. Then I created a list of all of the topics and ideas and turned it into a word cloud with Chatgpt. This gave an interesting overview of what I would like to see and what I can work on during this project.

Brainstorm session

Project Management	Content Creation	Data Processing and Analysis	Collaborative Tools	Customer interaction	Human Resources	Decision Support
Automation	Generative Design	Predictive	Chatbots	Process	Employee onboarding	scenario planning
Task	Automated writing	sentiment analysis	personal assistant	Workload balancing	talent mangement	business intelligence
Progress tracking	content curation	market trends	customer support	time management	satisfaction surveys	competitor analysis
Identification	idea generation	performance metrics	generate leads		performance reviews	strategic insights
Resource allocation
